TITLE North Dakota Kids Count! Fact Book, 1995: State, Regional and County Profiles of Child Well-Being in North Dakota.

INSTITUTION North Dakota Univ., Grand Forks. North Dakota Kids Count.

SPONS AGENCY Annie E. Casey Foundation, Baltimore, MD.

PUB DATE May 96

NOTE 160p.; For 1994 Fact Book, see PS 024 905.

AVAILABLE FROM North Dakota Kids Count!, University of North Dakota, P.O. Box 7090, Grand Forks, ND 58202-7090 ($13).

PUB TYPE Statistical Data (110) -- Reports - Descriptive (141)

EDRS PRICE MF01/PC07 Plus Postage.

DESCRIPTORS *Adolescents; At Risk Persons; Births to Single Women; Child Health; *Children; *Child Welfare; Early Parenthood; Economic Status; Educational Opportunities; Elementary Secondary Education; Family Characteristics; Population Distribution; Poverty; Preschool Education; Safety; *Social Indicators; Statistical Surveys; Tables (Data); *Well Being; Youth Problems

IDENTIFIERS *Indicators; *North Dakota

ABSTRACT

While many children across North Dakota enjoy positive life circumstances which support their healthy growth and development, many others do not. This Kids Count fact book presents a statistical portrait of the condition of North Dakota children from prenatal through adolescent stages of development, based on key indicators. These indicators include population statistics, family composition, economic condition, child health, education, child safety, and risk behavior by teens. Wherever possible, the 1995 Fact Book updates data reported in the previous year's book, to provide continuity in comparison of indicators. The book begins with an overview section containing brief definitions for each indicator in respective categories; a state profile and analysis for each category; and "Significance" boxes discussing the impact of indicators on the condition of children. Regional data, pertaining to the eight Human Service Regions through which state program administration occurs, are then presented. Regional data profiles are self-contained, and are followed by county profiles, which are arranged in alphabetical order. An alphabetized list of North Dakota's 53 counties and a state map precede data sections, and definitions of important terms and information on data sources are also provided. (EV)

Foreword

North Dakota KIDS COUNT!, funded by the Annie E. Casey Foundation, is housed in the Children and Family Services Training Center at the University of North Dakota Social Work Department. The purpose of North Dakota KIDS COUNT! is to collect uniformly available data about child well-being in every county of the state. The goal of this effort is to increase public awareness about the needs of local children and to promote responsible decision making on their behalf. This goal is underpinned by the belief that the more we know about the needs of North Dakota children, the more likely we are to commit ourselves to the work of improving their lives.

The North Dakota KIDS COUNT! project is organized as a group of collaborators who share responsibility for data collection and dissemination. The North Dakota State Data Center at North Dakota State University shares data collection responsibility with the Child Welfare Research Bureau at the University of North Dakota. Community education has been spearheaded by North Dakota State University Extension Youth and Family staff. Advocacy has been addressed by the North Dakota Children's Caucus, and Flint Communications has collaborated in the design of the Fact Book. The North Dakota KIDS COUNT! Advisory Board has provided insight and leadership in setting project goals and objectives.

The *1995 North Dakota KIDS COUNT! Fact Book* is the second Fact Book published by the North Dakota KIDS COUNT! project. The intent of this Fact Book is to again report child well-being according to a basic set of criteria uniformly available in each county. Indicators included in the book highlight circumstances affecting children from prenatal through adolescent stages of development. The most recent available data is used to measure the educational, social, economic, and physical well-being of children. Wherever possible the 1995 Fact Book updates data reported in last year's book, to provide continuity in comparison of indicators.

With the publication of this year's Fact Book, North Dakota KIDS COUNT! partners and advisors have placed special focus on the role of local communities in securing brighter futures for their children. During the past year, North Dakota KIDS COUNT! has taken important steps toward informing communities about the well-being of their children. North Dakota State University Extension staff have created a KIDS COUNT! curriculum as an educational tool for Extension Educators. Through the KIDS COUNT! curriculum, County Extension staff across North Dakota counties are bringing information and insight about local children to a variety of community audiences. County fact sheets, highlighting child well-being in each individual county have been prepared for local audiences. Communities are learning more about the factors affecting their children and discussing shared concerns.

Organization of Data

The 1995 North Dakota KIDS COUNT! Fact Book has been arranged to provide a picture of State, Regional, and County child well-being. Indicators are arranged in seven topical categories. The Overview section contains brief definitions for each indicator in respective categories; a state profile and analysis for each category; and "Significance" boxes discussing the impact of indicators on the condition of children. An alphabetized list of North Dakota's fifty-three counties and a state map indicating the location of North Dakota Regions, Counties, and Indian Reservations precedes data pages. Data pages follow the Overview section and include a state profile, followed by profiles of North Dakota's eight Service Delivery Regions and fifty-three counties. Regions are presented in numerical order. Counties are presented in alphabetical order. State, Regional, and County pages are followed by complete definitions and data sources, and a Summary section suggesting how the reader might use KIDS COUNT! data to benefit children. Suggestions from 1994 Fact Book Reader Surveys were incorporated in the layout of this year's book. Child well-being data represent American Indian children who live in respective county boundaries, but not those who live in tribal boundaries, with the exception of Head Start data which are reported by tribe. Development of a methodology to invite and facilitate the gathering of additional child well-being data for Indian children is currently being explored. All data referenced in this report were collected by North Dakota KIDS COUNT! unless otherwise indicated (by footnote) in "Significance" discussions for respective indicators. Cited data contributors are the final authority in each respective category.

Data Information

DATA SELECTION PROCESS

Data selection for the *1995 North Dakota KIDS COUNT! Fact Book* is geared to provide a snapshot of child well-being for state, regional, and county audiences. Data selected for this year's book have been chosen to replicate information presented in the 1994 book, and to offer new county indicators wherever possible. The hope in keeping indicators similar to those found in last year's Fact Book is to simplify comparisons between years.

CRITERIA FOR DATA SELECTION

Data have been selected which best portray outcomes related to child well-being, rather than programmatic data reflecting only those children in a particular service population. Programmatic data have been used when it is the best available measure of children affected by a particular condition. In these instances, caution must be exercised in assessing the actual number of children whose lives may be touched by a given situation. Indicators have been chosen on the basis of their availability by county; the validity of data sources; the ability to convey a broad array of child outcomes; the extent to which they provide for common interpretation; the possibility of their being available over time; and their usefulness as a tool to track progress in child outcomes.

DATA LIMITATIONS

Perhaps the most significant limitation encountered in striving to report indicators by county is the fact that some data are simply not available by county. For example, neither immunization statistics nor the number of uninsured children is available for counties. An additional limitation is the variability among counties in reporting criteria used for certain information. When consistency is lacking, respective data are not reported. Survey data are used only when they include a representative sample of North Dakota children. Finally, indicators based on Census data refer to 1990 Census information. Despite the time lapse between 1990 and the present, project data collectors see Census data as the most reliable available information for sparsely populated counties where more current estimates could be skewed due to the small numbers involved.

The Message Behind The Numbers

How can North Dakota KIDS COUNT! data help citizens, policy makers, parents, and communities create brighter futures for children? First and foremost, every person must recognize the importance of his or her contribution to the quality of every child's life. It is time for people in all walks of life to embrace their individual and collective responsibility for the conditions in which children either struggle or thrive. This responsibility is not partisan, nor can it be defined by political rhetoric. It is not conservative or liberal. The responsibility to ensure every child's successful journey to adulthood is rather, a human obligation reaffirmed in every generation. Parents, grandparents, aunts, uncles, teachers, clergy, nurses, doctors, and concerned adults can all become part of every child's successful journey. Children come into the world with different strengths and weaknesses. When the obstacles children face outnumber their assets, their journey may be interrupted temporarily or permanently. Physical, developmental, educational, economic, social, or family challenges may overwhelm a child's ability to cope. Sometimes communities of children are affected by challenges to their healthy growth and development. Regardless of the problem's source, every caring adult who comes into contact with a vulnerable, struggling child can help turn an area of weakness into a strength. Collectively, communities can turn the tide on problems affecting their children as well. No matter who we are, where, or how we encounter children in our lives, we can all raise the level of our commitment to help every child succeed. Individuals, parents, communities, and policy-makers must hold each other accountable for the safety, health, and well-being of North Dakota children. We must reclaim our role as protectors of children, and make their well-being our highest priority. Refer to the Summary Section of this book for more suggestions about ways to support North Dakota children.

Overview

We must reclaim our role as protectors of children, and make their well-being our highest priority.

kids count north dakota

Population

Definitions

Total Population
Total population projects the total number of people residing in North Dakota, based on 1994 population estimates. (Note that the 1994 estimates used in this publication were the most recent available figures at the time of printing.)

Population by Race of Children Under Age 19
The child population by racial composition reports the numbers of children in respective racial categories.

NORTH DAKOTA ANALYSIS

The total population of North Dakota in 1994 was estimated at 637,990. (Note that the 1994 estimates used in this publication were the most recent available figures at the time of printing). This figure is slightly under the total number of residents counted in the 1990 Census, 638,800. This means limited residential growth is occurring within the state. In fact, many parts of the state are losing population, especially those under the age of 18. Between 1990 and 1994, losses in the number of children under the age of 18 occurred in most counties. The decline exceeded 7 percent in one of four counties. The greatest losses were among school-aged children 6-17. Only 8 of 53 counties showed an increase in this age group since 1990. Declines among pre-schoolers, those under the age of 6, were also dramatic with the majority of counties losing more than 10 percent since 1990. The growth among children which did occur was largely in the eastern half of the state.

The racial composition in North Dakota is very homogeneous. Nearly 95 percent of the total population is white. Native Americans represent the largest minority group in the state with roughly 26,000 residents. The fastest growing minority segment of the state, however, is the Asian population. During the past decade, their number grew by nearly 75 percent rising from 1,979 to 3,462.

POPULATION FAST FACTS

- North Dakota's population in 1994 is below that of 1990.
- The number of children in North Dakota under 5 years of age dropped nearly 10% between 1990 and 1994; an estimated 5,800 children.
- The number of school-age children increased slightly between 1990 and 1994 roughly 2% to 119,409.
- 95% of the state's total population is white.

Population

SIGNIFICANCE

- Population data can provide a frame of reference for interpreting child well-being indicators detailed in this report. Age specific information is especially useful to individuals and organizations involved in planning for schools, health services, housing, economic development, and human services, to name a few.
- Both national and state population trends confirm that children are a declining proportion of the United States population. This trend is attributed to older Americans living longer and families having fewer children.
- The decreasing proportion of children and the increasing proportion of the elderly in the United States and North Dakota population point to the increasing burden future workers will carry for American retirees. This factor underscores the importance of ensuring that today's children are adequately prepared to become tomorrow's adults.
- In North Dakota, where rural counties are losing population and urban counties are either increasing in population or remaining stable, children residing in small towns with shrinking populations may be affected by shortages in the resources needed to support their healthy growth and development.
- Demographers predict that the proportion of minority children will continue to increase over the next 20 years. By the year 2000, one-third of American school children are expected to be non-white, compared to one-fifth today.
- American Indian children comprise the largest minority in North Dakota. Indicators reflecting their well-being reveal that the majority of these children face greater challenges to growing up healthy than white children in North Dakota.

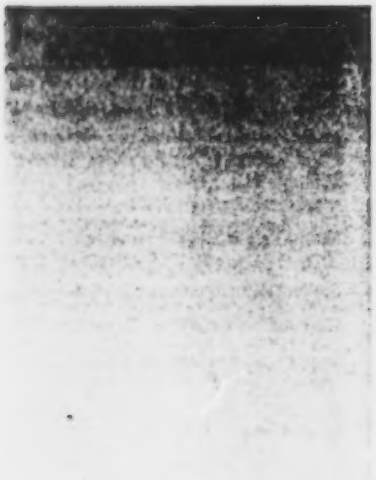
Family Composition

Definitions

Children Under Age 18 Living in Single Parent Families
Children who live in families headed by one person - male or female - with no spouse present in the home.

Females Over Age 15 with Children Under 18
This includes the number of women over age 15 with children in respective age categories and the percentage of these women in the North Dakota Labor Force.

Children Under Age 19 in Foster Care
Children placed in living situations outside their family homes as a result of Juvenile Court intervention.



NORTH DAKOTA ANALYSIS

Over 85 percent of the families in the state are married couple families. Although the number of single-parent families is on the rise, only about 14 percent of children in the state are living with a single-parent. Nationally, more than one in four children are living in a single-parent family.

A growing number of women in North Dakota continue to enter the labor force. Currently, over 69 percent of mothers in the state with pre-schoolers, those under the age of 6, are actively in the labor force. This is 10 percentage points higher than the national average. Similarly, 79.4 percent of mothers with school-aged children are actively in the labor force, 4 percentage points higher than the national average.

FAMILY COMPOSITION FAST FACTS

- In 1990, nearly 86% of all families in North Dakota were married couples.
- In 1990, 14% of all children below the age of 18 lived in single-parent homes in North Dakota ranking the state 3rd lowest in the nation.
- Nearly 70% of women in North Dakota with children under the age of 6 are in the labor force.
- Over 75% of women with children between 6-17 years of age are in the labor force.
- Less than 1% of children under 19 years of age live in foster homes in North Dakota.

Family Composition in North Dakota, 1990

Family Composition

SIGNIFICANCE

- Family Composition is one of many factors influencing a child's formative years. Family structure is intertwined with a child's other strengths and liabilities (both personal and family) as a predictor of life outcomes.
- Because the structure of the American family has evolved to include many combinations of non-traditional arrangements, the physical, emotional, and financial support of children is of greater concern for many of today's families.
- Except in cases where a father's behavior poses a risk to family members, the absence of fathers in families is related to negative outcomes for children, including poverty.
- High quality child care can be a major influence in supporting a child's healthy growth and development. While choosing child care is a challenge for all families, low income families often lack the financial resources to place their children in the kind of care arrangements they prefer.
- By 1993, an estimated 450,000 U.S. children were in foster care. This number represents a two-thirds increase in the national foster care caseload since 1983 and involves more children than any time in the previous two decades.
- In addition to the increased prevalence of conduct disorders, depression, difficulties in school, and impaired social functioning among foster children, about 30% have severe emotional problems. Another 58% of young children in foster care have serious health problems.

Economic Condition

Definitions

Persons Under Age 21 Receiving AFDC & Medical Assistance

Aid to Families with Dependent Children is an entitlement program that provides a monthly payment to parents or guardians on behalf of eligible children who are defined as "dependent". Children must be found eligible to receive such assistance. **Medicaid** is a joint federal-state matching entitlement program in which Federal and state dollars combine to purchase health care for the poor elderly or disabled and for poor children and their families.

Children Under Age 18 Living in Poverty

Children living in poverty are related children under age 18 who live in families with incomes below the poverty threshold, as defined by the U.S. Office of Management and Budget.

Median Income of Families with Children Under Age 18

Median Income is the middle point income of the total number of families with children, including those with no income.

Children in Near-Poor or Working-Poor Families

Near-poor children under age 18 are those who live in families with incomes between 100 and 149 percent of the U.S. Poverty Threshold.

NORTH DAKOTA ANALYSIS

The economic security of North Dakota's children is becoming increasingly more problematic. Various economic indicators of children's well-being are distressing. For example, 36,274 persons under the age of 21 received AFDC (Aid to Families with Dependent Children) and Medical Assistance in fiscal year 1994. If these recipients were gathered together in one location, their group would be larger than North Dakota's fourth largest city, Minot. Similarly distressing is the fact that the number of impoverished children (under 18 years of age) in North Dakota is only slightly smaller than the number of residents in Minot. Or, consider there are more impoverished children under the age of 5 (9,322) than there are people in Wahpeton (9,207), North Dakota's tenth largest city.

The threshold for poverty is based on an estimate of the amount of money individuals need to maintain a minimal level of subsistence. It is determined by the number and age of persons in a household or family.

ECONOMIC CONDITION FAST FACTS

- In fiscal year 1994, 36,274 persons under age 21 received AFDC and Medical Assistance in North Dakota.
- In 1990, 29,732 children under the age of 18 were impoverished in North Dakota, 9,322 of these children under the age of 5.
- In fiscal year 1995, 24,296 women, infants, and children participated in North Dakota's WIC program.

Economic Condition

SIGNIFICANCE

- A child's economic condition is dependent upon the ability of his or her parents to provide the resources that support healthy growth and development.
- Poor children face increased risks when their physical and developmental needs cannot be addressed as they occur, due to limited resources. Such delays during a child's early years can have consequences throughout childhood and into adulthood.
- Historically, needy families and children have been guaranteed protection from undue economic hardship by the AFDC and Medicaid entitlement programs. However, proposed changes in the structure and delivery of these programs would remove the guarantee that help will be available to those who need it.
- Despite the assistance that has been available to eligible families, the number of poor children has continued to increase steadily over the past two decades. By the early 1990's, a child was nearly twice as likely as an adult to be poor.
- Working poor families are facing greater challenges to provide for their children. Wages for the low-paying jobs available to many of these families have steadily decreased. Often ineligible for entitlement programs, these parents are typically unable to provide health care, dental care, and the like for their children.
- The Median Income for families with children is a telling reflection of the widening gaps in economic security among families. A recent report by the Center on Budget and Policy Priorities found that wages for male full-time year-round workers fell for the second consecutive year in 1994.

"Despite the assistance that has been available to eligible families, the number of poor children has continued to increase steadily over the past two decades..."

Child Health

Definitions

Federal Reimbursement for "Basic" Child Nutrition Programs
Federal reimbursement for "basic" child nutrition programs is the amount of money the federal government contributes to School Lunch, Breakfast, and Milk programs.

Persons Under Age 21 Receiving Medicaid
Children receiving Medicaid is the number of eligible children enrolled in this federal entitlement program. The program is designed to assist eligible individuals and families obtain health care.

WIC Participants
WIC participants are eligible women, infants, and children who take part in the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC). WIC is a prevention program targeted to provide nutrition, education, nutritious food, and access to health care.

Low Birth Weight Babies
Low birth weight babies are infants weighing less than 2,500 grams (5.5 pounds) at birth. Data are reported by mother's county of residence, rather than the location of the hospital where the birth occurred.

Deaths of Infants Under Age 1
Deaths of infants under age 1 is the number of babies who die before their first birthday. These data are recorded on death certificates by the mother's county of residence.

Deaths of Children Under Age 20
Deaths of children under age 20 reports the number of children who die before their twentieth birthday. Data are obtained from death certificates by the child's county of residence.

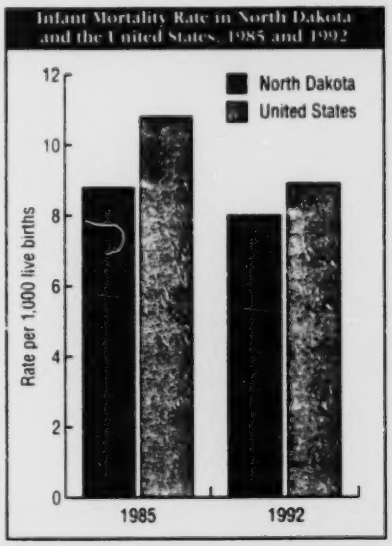
Inadequate Prenatal Care
Women with inadequate prenatal care is the number of pregnant women who delay prenatal care until the third trimester or do not complete recommended visits prior to the birth of their child.

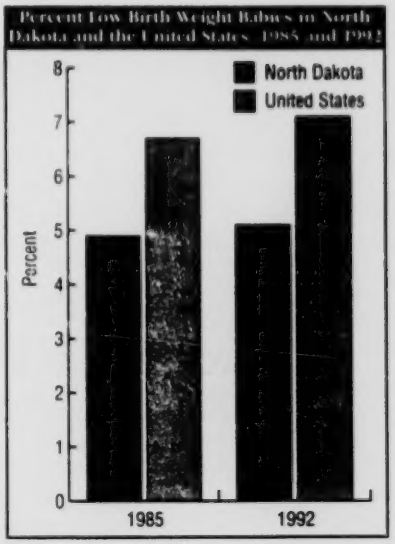
NORTH DAKOTA ANALYSIS

Children's health in North Dakota is very favorable. Some of the leading indicators of child health indicate that North Dakota is significantly above national averages. For example, infant mortality rates continue to decline in the state dropping below 7.8 deaths per 1,000 live births. In addition, child death rates have fallen below 26.5 deaths per 100,000 children. An area where the state has slipped with respect to child health is low birth weight babies. Between 1985 and 1992, the proportion of low-weight births (those under 5.5 pounds) in North Dakota has increased slightly to just above 5 percent of all births. Although this is movement in the wrong direction, North Dakota ranks 3rd lowest in proportion of low-weight births.

CHILD HEALTH FAST FACTS

- In fiscal year 1994, 34,022 people under the age of 21 received Medicaid in North Dakota.
- In 1994, 142 deaths of children under 20 were reported in North Dakota, of which 62 were infants under the age of 1.
- In 1994, 465 low weight births (under 5.5 pounds) were reported in North Dakota.





Source: *ND State Dept. of Health & Consolidated Labs*

Child Health

SIGNIFICANCE

- Health care is especially important during critical early years when chronic illnesses can be detected, because preventive care and early intervention are crucial to positive childhood health outcomes.
- Lack of health insurance may be the most important barrier to health care for American children. During 1993 13.5% of children nationally and 10.9% of North Dakota children did not have health insurance at anytime during the year.
- Medicaid has become an increasingly important source of health insurance for low-income children, as a buffer against declines in employment-based insurance for both children and adults. Even children with Medicaid often lack dental care because of low provider reimbursement.
- Child nutrition is a critical factor in every child's ability to grow up healthy. Poor nutrition can retard physical growth, brain development, and cognitive functioning. Key federal nutrition programs such as School Breakfast/Lunch/Milk and WIC have had remarkable success in improving children's diet, health, and ability to learn. Experts fear that if funding for these programs is shifted to states, more children will go hungry.
- Of great importance as a preventive health measure, childhood immunizations continue to fall short of optimal dosage for many young children. During a 9-month immunization survey in 1994, only 81% of North Dakota children were documented as "adequately immunized."
- While advanced medical technology has greatly improved outcomes for many vulnerable babies, wide variability in infant mortality, low birth weight births, and inadequate prenatal care compromises too many American children.

"Lack of health insurance may be the most important barrier to health care for American children."

Education

Definitions

Average Expenditures Per Pupil
Average expenditures per pupil is the average cost of educating each student in a given area. The average cost per pupil is obtained by dividing instruction, administration, and operation costs for school plants in counties, regions or the state by the average number of students in daily attendance during a school year in respective areas.

Average Daily Membership of Public Schools
Average daily membership is the average number of students attending public schools on a daily basis in North Dakota. Data are reported by counties, regions, and the state for a respective school year.

Number and Rate of Dropouts Grades 9-12
The dropout rate of children in grades 9-12 measures the proportion of the children in this population who have not completed high school and are not enrolled at a given point in time, regardless of when they dropped out.

Children Ages 3-4 Enrolled in Head Start - Center Based, Home Based, and Reservation Based
Children ages 3-4 enrolled in Head Start is the best available estimate of on- and off-reservation eligible 3-4 year olds enrolled in Center Based, Home Based, or Reservation Based Head Start pre-school programs. Not all eligible children are enrolled.

Special Education Enrollment
Special education enrollment includes children in special education classes by three selected categories: seriously emotionally disturbed, speech impaired, and specific learning disability.

Average ACT Composite Scores
Average ACT scores refer to the average scores obtained by students in North Dakota counties, regions and the state on the American College Test (ACT) college entrance exam. ACT scores are designed to predict a student's potential for success in college.

NORTH DAKOTA ANALYSIS

The average daily membership of all ND public schools in the 1993-1994 academic school year was 120,411 students, with average daily membership in county school districts ranging from 53 to 18,260 students. During that same academic year, an average of $4,262.42 was spent per pupil. Thirty-three counties spent more than the state average, with one county spending almost three times ($12,436.42) the state average per student.

As a whole, North Dakota's students' average composite ACT score (21.2) surpassed the national average score (20.8) for the 1993-1994 school year. North Dakota counties' average composite scores for students ranged from 17.5 to 22.4. North Dakota Caucasian children, as a group, scored up to 3.5 points higher than students of other racial backgrounds in North Dakota.

Of the children enrolled in grades 9-12, 2.6% dropped out of school in the 1993-1994 school year. Dropout rates in nine counties exceeded the state average, and three of these counties had rates three to five times higher than the state rate.

There were 12,367 students enrolled in special education as of December 1, 1994. Forty-five percent of the children enrolled were identified with a specific learning disability as their primary handicap. Some 33% were speech impaired, and five percent were identified as seriously emotionally disturbed.

Slightly more North Dakota children were enrolled in off-reservation Head Start programs in 1995 (1,711 children) than in the previous year (1,682 children). When on-reservation programs are included, the total number of children enrolled in the fall of 1995 reached 2,448. Almost one-third (30.1%) of the total Head Start enrollment for 1995 were children in reservation based programs, which were all center based programs. It is estimated that less than half (40.4%) of the total number of children eligible for Head Start in 1995 were enrolled. Eligibility figures are conservative estimates of actual need based on the number of children who are AFDC and income eligible.

EDUCATION FAST FACTS

- The average daily membership in all North Dakota public schools in the 1993-1994 academic year was 120,411 students, with an average of $4,262.42 spent per pupil.
- 1993-1994 ACT average composite score was up to 3.5 points higher for North Dakota Caucasian students when compared to students of other racial backgrounds.
- Nearly three percent of the students enrolled in grades 9-12 during the 1993-1994 academic year dropped-out of school.
- 12,367 children were enrolled in special education as of December 1, 1994; five percent were identified as seriously emotionally disturbed.
- Estimates suggest that less than half (40.4%) of all the children eligible for Head Start were enrolled in Head Start programs in 1995.

Education

SIGNIFICANCE

- The stage is set for later school success during early infancy and is influenced by a host of factors. Among these are: prenatal and infant health, the quality of child care provided, pre-school educational opportunities, and the social/economic circumstances of the family. Early investments in the health of children and the vitality of families can make a difference in ultimate educational outcomes.
- Head Start is recognized as a major pre-school education resource for economically disadvantaged 3-5 year old children. Through program emphasis on cognitive and language development; medical, dental, and mental health services; nutritional and social services; and strong parental involvement, children can improve their potential for school readiness and later achievement. The program does not reach all the children who need it.
- Ensuring that children start school ready to learn and succeed academically are key factors in preventing a multitude of other problems. School failure can begin at very early ages, and once it has begun, sets the stage for a host of negative behaviors, such as delinquency, substance abuse, and sexual activity.
- Although the need for a more challenging curriculum has been widely recognized as a necessary component of education today, many schools have failed to adopt courses that go beyond simple memorization of facts to teach higher-order thinking skills and problem-solving. Schools must tailor educational practices to ensure that students are prepared to enter a labor force where minimum skill jobs are rapidly disappearing.
- North Dakota's relatively low high school drop-out rate in itself is cause for optimism. However, when the drop-out rate is combined with the trend for rural high school graduates to move away, the proportion of remaining young adults who have not completed high school rises.

"...Schools must tailor educational practices to ensure that students are prepared to enter a labor force where minimum skill jobs are rapidly disappearing."

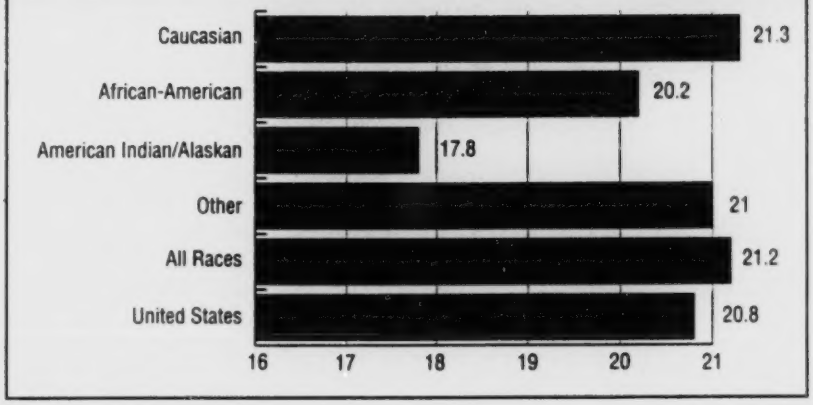
North Dakota Composite ACT Scores by Race



Child Safety

Definitions

Child Abuse and Neglect Reports

Child abuse and neglect reports are the total number of official reports made to the North Dakota Department of Human Services, as well as other entities during Fiscal Year 1994. "Official" reports are formal reports indicating that child abuse or neglect may be taking place.

Child Abuse and Neglect Probable Cause Cases

Child abuse and neglect probable cause cases are those cases of child abuse or neglect which are substantiated after investigation by the North Dakota Department of Human Services.

Licensed Child Care Providers

Licensed child care providers are individuals or organizations to whom permission has been granted by the North Dakota Department of Human Services to operate a family child care home, group child care facility, child care center, or pre-school educational facility.

Standard Compliance Certification/In-Home Providers

Standard compliance certification/in-home providers includes individuals who provide child care in their home or a child's home but are not licensed by the state of North Dakota and care for five or fewer children. These providers complete a voluntary self-certification process.

Licensed Child Care Capacity and Standard Compliance Certification/In-Home Capacity

Child care capacity for Licensed, Standard Compliance Certification, and In-Home Providers is the number of children for whom care can be provided by respective care givers.

Children Impacted by Domestic Violence

Children impacted by domestic violence is the number of children who are reported to be affected by domestic violence occurring in their homes.

NORTH DAKOTA ANALYSIS

The incidence of child abuse and neglect in North Dakota reached an all time high in Fiscal Year 1994, when 4,747 reports of child abuse and neglect were recorded. In 45.8% of these reports, probable cause was found. About 31% of probable cause cases involved abuse; 48% neglect; 13% abuse and neglect; and in 7% sexual abuse was indicated. Together 3,939 victims of child abuse and neglect were identified. This means that there were nearly eleven victims of child abuse and neglect every day in North Dakota.

From January 1 through June 30, 1995, 2,627 children were impacted by domestic violence, or an estimated 5,416 children during that year. These children constituted about three percent of the total estimated child population under age 18 in North Dakota. However, the number of children impacted in each county ranged from 0-14.1% of the respective county child population.

Fifty-five percent (2,096) of the child care providers in North Dakota were licensed providers, while about 45% (1,697) were standard compliance certified or in-home providers. Together, they had the capacity to serve 37,186 children as of August 1, 1995. This number represents a seven percent decrease in capacity compared to the same time last year. Nearly half (43.2%) of all child care providers resided in counties within the two most densely populated regions in North Dakota. They provided care for 43.6% of the children served by all child care providers in North Dakota.

CHILD SAFETY FAST FACTS

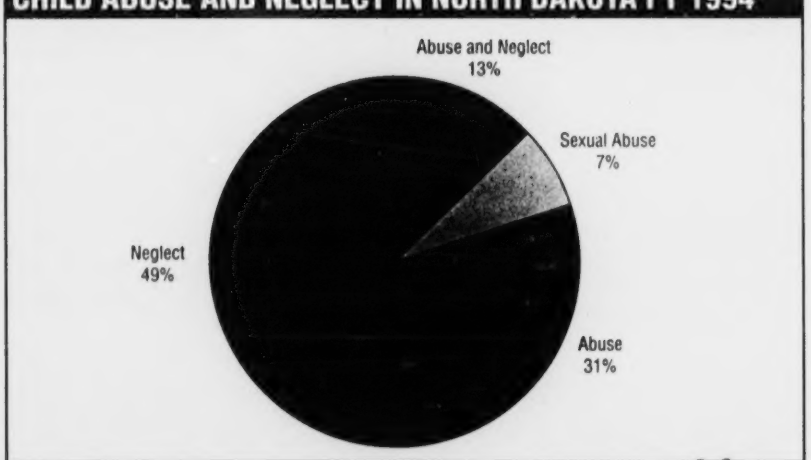
- The incidence of child abuse and neglect reached an all time high in North Dakota, with 4,747 reports identified during fiscal year 1994.
- In fiscal year 1994, there were nearly eleven victims of child abuse and neglect in North Dakota every day.
- An estimated three percent of North Dakota's children under age 18 were impacted by domestic violence in calendar year 1995.
- Fifty-five percent of all child care providers in North Dakota in 1995 were licensed providers, while 45% were standard compliance certified or in-home providers.
- North Dakota child care providers had the capacity to serve 37,186 children in North Dakota as of August 1, 1995, a seven percent decrease in the capacity able to be served at the same time last year.

Child Safety

SIGNIFICANCE

- The safety of children is being impacted by growing levels of violence in American society. To varying degrees, there is an acceptance of violence as a technique for punishment, a strategy for dealing with conflict, and a form of entertainment.
- Too many American children are victims of child abuse and neglect, and experts fear their numbers are growing more rapidly than official reports indicate. In 1993, just over 1 million children were substantiated victims of maltreatment. Other estimates, including a recent Gallup poll featuring self-reports of parents about their discipline methods, suggest the actual number of physically abused children may be as high as 3 million.
- Even more tragically, growing numbers of young children are dying as a result of abuse and neglect. Nationally, some 2,000 infants and young children die at the hands of their parents or caretakers each year. Children under age 4 are more likely to die from abuse or neglect than from motor vehicle accidents, fires, drowning, suffocation, choking, or falls.
- Domestic violence endangers children in households where it occurs. It is estimated that 4 million women are battered each year, and that violence between partners frequently occurs in the same homes where violence is perpetrated against children. It is conservatively estimated that half of men who batter their women partners also abuse the children in the home.
- Children who are traumatized by violence face serious risks to their healthy growth and development. In addition, the psychological and physical scars they suffer can predispose child victims to victimize others as they grow into adolescence and adulthood.
- With a majority of American mothers in the workforce, the safety and well-being of many children is entrusted to child care providers each day. While increased flexibility makes family child care attractive to many parents, research suggests some 82 - 90% of family child care is unregulated, placing large numbers of children in settings where health and safety standards are not met.

CHILD ABUSE AND NEGLECT IN NORTH DAKOTA FY 1994



20

"...It is estimated that 4 million women are battered each year, and that violence between partners frequently occurs in the same homes where violence is perpetrated against children."

Teens At Risk

Definitions

Out-of-Wedlock Births to Teens Ages 12-19

Out-of-wedlock births to teens is the number of births to 12-19 year old young women who are not married at the time of conception, at the time of birth, or at any time between conception and birth.

Juvenile Court Referrals

Juvenile court referrals is the number of cases that have been referred to juvenile court in 1993 by police, parents, school teacher/officials, or other sources. Only the top three referral categories are included: Unruly Behavior, Offenses Against Person, and Offenses Against Property.

Children Grades 7-12 Smoking Cigarettes Regularly

Children grades 7-12 smoking cigarettes regularly refers to children whose survey responses indicated they smoked from less than one pack to more than one pack of cigarettes per day (on the 1993 North Dakota Youth Alcohol and Drug Survey).

Children Grades 7-12 Ever Using Alcohol

Children grades 7-12 ever using alcohol refers to children whose survey responses indicated they used alcohol from less than once a month to every day (on the 1993 North Dakota Youth Alcohol and Drug Survey).

Children Ages 16-19 Not Enrolled in High School, Not High School Graduates, and Not in the Labor Force

Children not enrolled in high school and not in the labor force measures the proportion of the population in this age category, who have not completed high school and are not enrolled at a given point in time; nor are they in the labor force at a given point in time.

NORTH DAKOTA ANALYSIS

There were 616 out-of-wedlock births to teens in 1994, constituting 7.2% of all live births. Twenty-three counties reported percentages above the state average with ten of these county percentages ranging from 3-14% higher than the state average.

Looking at out-of-wedlock births regionally, half of the regions fell above and half fell below the state average of 7.2%. In two regions, out-of-wedlock percentages were well above the state average with one region more than doubling the state figure. Neither of these regions was a highly populated area.

There were 7,401 referrals to juvenile court in 1993. The majority of children were referred for acts of unruly behavior (40.6%) or offenses against property (39%). However, 6.2% of the referrals were for offenses against persons. The four counties with the highest numbers of juvenile court referrals were counties with higher population densities. Together, these counties accounted for 53.1% of all juvenile court referrals in North Dakota.

In a 1993 survey of children in grades 7-12, 52.7% of the students reported ever using alcohol, while 14.1% reported smoking cigarettes regularly. Youths in nineteen counties reported alcohol use lower than the state average, while 32 counties reported higher percentages than the state average, with 73.1% being the highest percentage reported.

In seventeen North Dakota counties, surveyed youth reported levels of regular cigarette use higher than the state average of 14.1%. Four counties reported percentages from 7% to nearly 18% higher than the state average.

TEENS AT RISK FAST FACTS

- 7.2% of all live births in 1994 were to teens ages 12-19.
- One Region's percentage of out-of-wedlock births more than doubled the state's average.
- 14.1% of North Dakota children surveyed reported smoking cigarettes regularly.
- 52.7% of North Dakota children surveyed reported ever using alcohol.
- In 1993, there were 7,401 referrals to juvenile court involving 5,670 youth.
- About 41% of all juvenile court referrals in 1993 were for unruly behavior, and 39% were for offenses against property.

Teens at Risk

SIGNIFICANCE

- Adolescence is a time of transition for children, as they prepare to cross the bridge from childhood to young adulthood. Many adolescents successfully complete this journey. However, an estimated one-fourth of 10 to 17 year olds engage in risk-taking behaviors that seriously threaten their ability to grow into responsible adults.
- Recent research tells us that our youngest adolescents - those between the ages of 10 and 14 - are especially vulnerable. As a society we are giving them more freedom, autonomy, and choice, rather than the continued nurturing, protection, and guidance they need. It is believed that children today are under pressure to engage in risk-taking behaviors at earlier ages, but are unprepared to weigh the consequences of such behaviors.
- Teenagers account for about half of all first births to unmarried women. Too early childbearing exposes an adolescent and her infant to health risks, diminished educational opportunities and poverty. Recent research documents that teens with a firm belief in their futures and a clear understanding of responsible sexuality are more likely to delay sexual activity and childbearing.
- Disturbing evidence suggests that early sexual activity is often not a voluntary act, especially in the case of young teens. In fact, for the majority of young women who are 14 or younger when they initially have sex, the majority of intercourse experiences are non-voluntary. Recent findings further suggest that among unmarried teenage mothers, two-thirds of the fathers are age 20 or older.
- Adolescents who commit crimes are influenced by a web of factors, beginning in the earliest stages of development. These risk factors include poverty, family breakdown, child abuse and neglect, weakening moral guidance, repeated exposure to violence, and for some, ready access to guns. Tragically, children are both victims and perpetrators in a society where the need for successful youth development prevention programs competes with the imposition of harsher standards for prosecuting youth.
- Substance use and abuse among teens has continued to increase in recent years, and sends a signal that more progress is needed in order to protect young people from its long-term negative consequences. Of special concern are increases in substance use among young adolescents, particularly alcohol and marijuana use.

"...It is believed that children today are under pressure to engage in risk-taking behaviors at earlier ages, but are unprepared to weigh the consequences of such behaviors."

5 - percentage of 1990 child population under age 18 in county/in ND
6 - number indicates women with children in respective age category; percentage indicates the percentage of those women with children in respective age categories who are in the labor force in the county/in ND
7 - percentage of estimated 1994 child population under age 19 in county/in ND
8 - percentage of children in foster care in county/in ND
9 - percentage of total AFDC & Medical Assistance recipients in county/in ND
10 - percentage of 1990 child population under age 5 in county/in ND
11 - percentage of 1990 child population ages 5-17 in county/in ND
12 - percentage of state median income of families with children under age 18 in ND
13 - percentage of total Federal reimbursements for "basic" child nutrition programs to ND
14 - percentage of Medicaid recipients under age 21 in ND
15 - percentage of total WIC recipients in ND
16 - percentage of total live births in county/in ND
17 - percentage of total deaths in county/in ND
a - Estimates for racial composition are not available for 1994; therefore 1990 Census data were used.
b - unduplicated cases; excludes subsidized adoption

3 - percentage of total 1990 population in county/in ND
4 - percentage of 1990 child population under age 19 in county/in ND
5 - percentage of 1990 child population under age 18 in county/in ND
6 - number indicates women with children in respective age category; percentage indicates the percentage of those women with children in respective age categories who are in the labor force in the county/in ND
7 - percentage of estimated 1994 child population under age 19 in county/in ND
8 - percentage of children in foster care in county/in ND
9 - percentage of total AFDC & Medical Assistance recipients in county/in ND
10 - percentage of 1990 child population under age 5 in county/in ND
11 - percentage of 1990 child population ages 5-17 in county/in ND
12 - percentage of state median income of families with children under age 18 in ND
13 - percentage of total Federal reimbursements for "basic" child nutrition programs to ND
14 - percentage of Medicaid recipients under age 21 in ND
15 - percentage of total WIC recipients in ND
16 - percentage of total live births in county/in ND
17 - percentage of total deaths in county/in ND
a - Estimates for racial composition are not available for 1994; therefore 1990 Census data were used.
b - unduplicated cases; excludes subsidized adoption

Definitions and Data Sources

County Seat is the designated location for county government functions.

SOURCE: U.S. Department of Commerce, Bureau of the Census.

State Population Rank is based on the ordering of all counties in the state by population.

SOURCE: Estimates of the Resident Population, North Dakota, 1994. U.S. Department of Commerce, Bureau of the Census.

Land Area is the size of a county in square miles.

SOURCE: 1990 Census Population and Housing, Population and Housing Unit Counts, North Dakota, 1990 CPH-2-36, U.S. Department of Commerce, Bureau of the Census.

Number of Households is the total number of persons who occupy a housing unit. A housing unit is a house, an apartment, a mobile home, a group of rooms, or a single room used as a separate living quarter. The number listed in this category reflects a person or groups of people living in a housing unit. For example, people living in a mobile home create one household. A mobile home could be unoccupied and be classified as a housing unit, not a household.

SOURCE: Household and Family Estimates, 1994, North Dakota State Data Center, Fargo, North Dakota.

Number of Families includes a householder and one or more other persons who are related to the householder by birth, marriage, or adoption.

SOURCE: Household and Family Estimates, 1994, North Dakota State Data Center, Fargo, North Dakota.

Population

Total Population, 1994 is the total number of people residing in North Dakota, based on 1994 population estimates. (Note that the 1994 estimates used in this publication were the most recent available figures at the time of printing). Age categories 0-5 years and 6-17 years indicate the total number of children in these respective age groups under the age of 18, according to 1994 population estimates. Total population estimates are compiled by the Census Bureau and based on estimates derived from administrative records: i.e., vital statistics, school enrollments, vehicle registrations, IRS filings, etc.

SOURCE: Population Estimates Branch, United States Bureau of the Census. North Dakota State Data Center, Fargo, North Dakota.

Population by Race of Children Under Age 19, 1990 denotes the child population by racial composition from the 1990 Census. (1994 child population estimates are not available by race). Racial categories include: White, Black, American Indian-Eskimo-Aleutian, and Other. Hispanic is reported as a discrete classification because it is considered a separate ethnic category, which includes children of different racial backgrounds. Racial categories can be viewed as the ancestry, nationality group, lineage, or country of birth of the person or the person's parents or ancestors before their arrival in the United States. Persons of Hispanic origin may be of any race.

SOURCE: Summary Tape File 1, Table P12, U.S. Department of Commerce, Bureau of the Census.

Family Composition

Children Under Age 18 Living in Single Parent Families, 1990 is the number of children under age 18 who live in families headed by a person - male or female - with no spouse present in the home. Children in this category include "own children" under 18 who are never married and are related to the family by birth, marriage, or adoption.

SOURCE: Summary Tape File 1, Table P21, U.S. Department of Commerce, Bureau of the Census.

Females Over Age 15 with Children Under 18, 1990 is the total number of women over age 15 with children under 18, and the percentage of these women in the North Dakota Labor Force. With Children Under 6 includes women with children under 6 only, and women with children under 6 and one or more children ages 6-17 years, and the percentage of these women in the Labor Force. With Children 6-17 includes women with children ages 6-17 only, and the percentage of these women in the Labor Force. The Labor Force is defined as persons over age 15 who are employed (part- or full-time) or unemployed (have at some time been in the labor force and intend to be again). People not in the labor force include all persons 16 and over not classified as members of the labor force, such as students, retired people, housewives, and institutionalized people.

SOURCE: Summary Tape File 4B, Tables PB49 and PB56, U.S. Department of Commerce, Bureau of the Census.

Definitions and Data Sources

Children Under Age 19 in Foster Care, 1994 includes children in Family Home Placements (an occupied private residence in which foster care is regularly provided by the owner or leasee thereof to no more than four children, unless all of the children in foster care are related to each other by blood or marriage in which case such limitation shall not apply); N.D. Residential Child Care Facility (a facility other than an occupied private residence providing foster care to more than eight unrelated children, except as may be otherwise provided by rule or regulation) Group Home Placements (an occupied private residence in which foster care is regularly provided for more than four but less than ten unrelated children); and Out-of-State Placements (follow the criteria of either of the above, and the children are placed out of the state).

SOURCE: North Dakota Department of Human Services, Division of Children and Family Services. 1994. Foster Care -- Descriptive Characteristics of Children in Care, Fiscal Year 1994. Bismarck, N.D.

Economic Condition

Persons Under Age 21 Receiving AFDC & Medical Assistance, 1994 Aid to Families with Dependent Children is an entitlement program that provides a monthly payment to parents or guardians on behalf of children who are defined as "dependent". AFDC is funded by both the federal and state governments and is administered by the state. Children must be found eligible to receive such assistance, by criteria laid down in federal and state law. Eligible are: needy children who have been deprived of support or care because of death, continued absence from the home, underemployment or unemployment of principal wage earner, or physical or mental handicap. Medical Assistance (Medicaid): Established in 1965, Medicaid is a joint federal-state matching entitlement program that pays for medically necessary health care services provided to eligible beneficiaries by qualified providers. Federal and state dollars combine to purchase health care for the poor elderly or disabled and for poor children and their families. Some Medicaid recipients include children who are not eligible for AFDC, but meet other Medicaid eligibility requirements, such as those with disabilities. The total number of children under age 21 receiving Medicaid only are listed under Child Health.

SOURCE: AFDC, Food Stamps, Medical Assistance, LIHEAP, Unduplicated Counts of Eligible Recipients and Cases by County of Physical Residence, Fiscal Year 1994, Research and Statistics, North Dakota Department of Human Services.

Children Under Age 18 Living in Poverty, 1990 is the number of related children under age 18 who live in families with incomes below the poverty threshold. The "Federal Poverty Line" or "Poverty Threshold" was established in 1964, using guidelines set by the Social Security Administration. Income cut-offs were based on a formula utilizing family and individual income, family size and age of family members. The formula was initially based on three times a family's food costs, according to the USDA's most economical food plans. The cost of this food plan has been adjusted each year to reflect more current economic guidelines.

The 1994 Federal Poverty Level Guidelines are:

Family Size	Hourly Wage	Annual Income
1	$3.52	$ 7,360
2	4.71	9,840
3	5.90	12,320
4	7.09	14,800
5	8.28	17,280
6	9.46	19,760

(Add $2,480 for each additional member)

SOURCE: Summary Tape File 4, Table PB100, U.S. Department of Commerce, Bureau of the Census.

Median Income of Families with Children Under Age 18, 1990 is the middle point income of the total number of families with children, including those with no income. The median income is the middle point income for this distribution: half of families with children fall above this point and half fall below.

SOURCE: 1990 Census of Population, Social and Economic Characteristics, North Dakota, 1990 CP-2-36, U.S. Department of Commerce, Bureau of the Census.

Children in Near-Poor or Working-Poor Families, 1990 denotes children under age 18 who live in families with incomes between 100 and 149 percent of the U.S. Poverty Threshold, as defined by the U.S. Office of Management and Budget.

Definitions and Data Sources

Child Health

Federal Reimbursement for Basic Child Nutrition Programs, 1993-94 Academic Year refers to School Lunch, School Breakfast, and Milk programs provided in schools. These federal child nutrition programs are structured as "entitlements" -- available to eligible children -- and funded by the federal government. Children who participate in school-based nutrition programs receive reduced-price or free breakfast, lunch, and/or milk at their schools. To receive a reduced-price meal, household income must be below 185% of the federal poverty level. For free meals, household income must fall below 130% of poverty. Children in food stamp or AFDC families are automatically eligible for free meals.

SOURCE: Child Nutrition and Food Distribution Programs, North Dakota Department of Public Instruction. Unpublished Data.

Persons Under Age 21 Receiving Medicaid FY 1994. Medicaid is a federally funded entitlement program available to eligible children based upon need. It is designed to assist individuals and families who do not have enough income to obtain health care. Medicaid is authorized by Title XIX, a 1965 amendment to the federal Social Security Act. Eligible persons include those receiving AFDC or SSI payments; those terminated by AFDC and in transition for 4-12 months; elderly, blind, or disabled people with low incomes; persons institutionalized, in foster homes, and certain adoptive children; and pregnant women with infants to age 6. Medicaid differs from Medicare which is a federally funded program for the elderly and disabled only.

SOURCE: Traditional Medicaid, Fiscal Year 1994, By County, Research and Statistics, North Dakota Department of Human Services.

WIC (Special Supplemental Food Program for Women, Infants, and Children) Participants, 1995. The WIC Program provides coupons for specific foods to low-income pregnant and postpartum women, infants, and children under age five. To be eligible for WIC, low-income women, infants, and children must be found to be at nutritional risk for medical or dietary reasons. WIC is a prevention program targeted to provide nutrition education, nutritious food, and access to health care. This is not an entitlement program.

SOURCE: North Dakota State Department of Health, WIC Program, Division of Maternal and Child Health.

Low Birth Weight Babies, 1994 refers to babies weighing less than 2,500 grams (5 pounds, 8 ounces) at birth. Data are obtained from birth certificates and are reported by mother's residence, rather than the location of the hospital where the birth occurred.

SOURCE: North Dakota Resident Vital Event Summary Data, 1978-1994, North Dakota Department of Health.

Deaths of Infants Under Age 1, 1994 reports the number of deaths occurring in infants under the age of one, as recorded on death certificates. Data are reported by the infant's county of residence, rather than the place of death.

SOURCE: North Dakota Resident Vital Event Summary Data, 1978-1994, North Dakota Department of Health.

Deaths of Children Under Age 20, 1994 is a report of deaths for children under age 20, as recorded on death certificates. Data are obtained on death certificates and are reported by the child's place of residence.

SOURCE: North Dakota Resident Vital Event Summary Data, 1978-1994, North Dakota Department of Health.

Inadequate Prenatal Care, 1994. These data are calculated by using both an infant's gestational age at birth and the number of prenatal visits completed by the mother at the time of birth: a) gestational age 14-21 weeks with no prenatal visits; b) gestational age 22-29 weeks with one or fewer visits; c) gestational age 30-31 weeks with two or fewer prenatal visits; d) gestational age 32-33 weeks with three or fewer prenatal visits; e) gestational age 34+ weeks with 4 or fewer prenatal visits. "Adequate prenatal care" denotes women who began their prenatal care in the first four months of pregnancy and given the age of gestation at birth, made at least 80% of the recommended physician or clinic visits prior to delivery.

Definitions and Data Sources

Average Daily Membership of Public Schools, 1993-1994 Academic Year is the average number of pupils enrolled per day for respective areas of North Dakota in the academic school year.

SOURCE: School Finance Facts, North Dakota Department of Public Instruction, 1995.

Number and Rate of Dropouts Grades 9-12, 1993-1994 Academic Year measures the proportion of this population who have not completed high school and are not enrolled at a given point in time, regardless of when they dropped out.

SOURCE: North Dakota Department of Public Instruction, Management, Information, and Research, 1995. Unpublished Data.

Children Ages 3-4 Enrolled in Head Start, 1995, Center Based, Home Based, and Reservation Based. Authorized by the Economic Opportunity Act of 1964, Head Start is a federally funded, comprehensive early childhood education program created to help prepare economically disadvantaged children ages 3 to 5 to enter and succeed in elementary school. Ninety percent of children in the program must be from families with an income at or below the federal poverty level, while ten percent can be from families that are not poor. At least ten percent of Head Start slots in each state must be reserved for handicapped children. Services include cognitive and language development; medical, dental, and mental health services (including screening and immunizations); and nutritional and social services. Parent involvement is a strong component of the program. In North Dakota, only 3-4 year olds are served, and not all eligible children are enrolled, as reflected in the variable participation rates among counties. Participation rates are impacted by both availability of programs and parental choice in enrolling their children.

SOURCE: North Dakota Head Start Directors. Response to Special Request for Head Start Data: Fall Enrollment, 1995. Unpublished Data.

Special Education Enrollment 1994 includes the number of children enrolled in selected special education categories: seriously emotionally disturbed, speech impaired, and specific learning disabilities. Seriously Emotionally Disturbed refers to a condition exhibiting one or more of the following characteristics, over a long period of time, and to a marked degree that adversely affects a child's educational performance: 1) inability to learn what cannot be explained by intellectual, sensory, or health factors; 2) inability to build or maintain satisfactory interpersonal relationships with peers and teachers; 3) inappropriate types of behavior or feelings under normal circumstances; 4) a general pervasive mood of unhappiness or depression; 5) a tendency to develop physical symptoms or fears associated with personal or school problems. The term also includes schizophrenia. The term does not apply to children who are socially maladjusted unless it's determined they have a serious emotional disturbance. Speech Impaired refers to a communication disorder such as stuttering, impaired articulation, a language impairment, or a voice impairment that adversely affects a child's educational performance. Specific Learning Disability refers to a disorder in one or more of the basic psychological processes involved in understanding or in using language, spoken or written, that may manifest itself in an imperfect ability to listen, think, speak, read, write, spell, or do mathematical calculations. The term includes such conditions as perceptual disabilities, brain injury, minimal brain dysfunction, dyslexia, and developmental aphasia. The term does not apply to children who have learning problems that are primarily the result of visual, hearing, or motor disabilities, of mental retardation, of emotional disturbance, or of environmental, cultural, or economic disadvantage.

SOURCE: North Dakota Department of Public Instruction, Division of Special Education. (1994). Special Education Child Count, 1994. Unpublished Data.

Average ACT Composite Scores 1993-1994 Academic Year are average scores for the composite American College Test (ACT) college entrance exam in the state, region, and county. ACT scores are designed to predict a student's potential for success in college. The highest possible score one can obtain is 36, and the average score in North Dakota is 21.2.

Child Safety

Child Abuse and Neglect Reports FY 1994 are the total number of official reports made to the North Dakota Department of Human Services on behalf of a child where there is the suspicion of child abuse or neglect. The North Dakota Century Code mandates certain persons (those who have contact with children as a part of their professional duties) to report incidents of suspected child abuse or neglect. Any person may report. The Department of Human Services or its designated agent, a regional or

Definitions and Data Sources

county child protective services social worker, will respond to the report by conducting a family assessment. The number of reported cases of child abuse and neglect typically differ from actual cases because not all instances of abuse and neglect will be reported. However, assessments will be conducted on all reported cases.

SOURCE: North Dakota Department of Human Services, Division of Children and Family Services (1995). Child Abuse and Neglect in North Dakota, FY 1994.

Child Abuse and Neglect Probable Cause Cases FY 1994: "Probable cause" is the term used in North Dakota to denote whether child abuse or neglect has been indicated, after an assessment has been conducted. If probable cause is found, abuse or neglect is substantiated. If probable cause is not found, abuse or neglect is not substantiated. Abuse includes fatality, brain damage skull fracture, subdural hemorrhage, bone fracture, dislocation sprain, internal injuries, intentional poisoning, burns scalds, severe cuts lacerations bruises, other major physical injury, minor fracture sprain, minor cuts bruises welts, twisting shaking, other minor injury, physical punishment without injury, emotional abuse, tying closed confinement. Neglect includes failure to provide nourishment, to provide shelter, clothing, health care, supervision and can also refer to educational neglect, emotional neglect, abandonment and failure to thrive. Abuse and Neglect is probable cause for both abuse and neglect as categorically aforementioned. Sexual Abuse includes intercourse, other sexual exploitation, sexual fondling, and other sexual related offenses as defined by North Dakota Century Code Chapter 12.1-20.

SOURCE: North Dakota Department of Human Services, Division of Children and Family Services (1995). Child Abuse and Neglect in North Dakota, FY 1994.

Licensed Child Care Providers, 1995 are individuals or facilities to whom the right, authority, or permission has been granted by the North Dakota Department of Human Services to operate a family child care home, group child care facility, child care center or pre-school educational facility. A license is required if early childhood services are provided for four or more children ages 24 months and under or six or more children at any one time. Family child care home means an occupied private residence in which early childhood services are provided for no more than seven children at any one time, except that the term includes a residence providing early childhood services to two additional school-aged children during the two hours immediately before and after the school day or all day (except weekends when school is not in session). Group child care home or group child care facility means a child care facility where early childhood services are provided for eight to eighteen children (inclusive) or a facility, other than an occupied private residence serving fewer than eight children. Child care center refers to an early childhood facility where early childhood services are provided to nineteen or more children. Pre-school educational facility denotes a facility offering early childhood services and following a pre-school curriculum and course of study designed primarily to enhance the educational development of the children enrolled in the facility. Children are served for no more than three hours per day.

SOURCE: North Dakota Department of Human Services. (August 1, 1995). Number and Capacity of Licensed Day Care Providers 1995. Unpublished Data.

Standard Compliance Certification/In-Home Providers, 1995 denotes child care providers who have completed an Affidavit of Standard Compliance and Child Care Provider Contract. This is a voluntary self-certification process for providers who are not licensed and care for five or fewer children.

SOURCE: North Dakota Department of Human Services. (August 1, 1995). Number and Capacity of Licensed Day Care Providers 1995. Unpublished Data.

Licensed Child Care Capacity, 1995 and Standard Compliance Certification In-Home Capacity, 1995 is the number of children that can be served by respective licensed, standard compliance, and in-home care providers.

SOURCE: North Dakota Department of Human Services. (August 1, 1995). Number and Capacity of Licensed Day Care Providers 1995. Unpublished Data.

Children Impacted by Domestic Violence, January 1-June 30, 1995 refers to the number of children affected by domestic violence occurring in their home. Domestic violence typically refers to the use or threat of physical force against a current or former partner in an intimate relationship, resulting in fear and or physical suffering on the part of the victim and witnessing household members.

SOURCE: North Dakota Council on Abused Women's Services, 1995. Unpublished Data.

Teens at Risk

Out-of-Wedlock Births to Teens Ages 12-19, 1994 are births occurring in 1994 to a mother who is not married at the time of conception, at the time of birth, or at any time between conception and birth.

SOURCE: North Dakota Department of Health and Consolidated Laboratories, 1994. Unpublished Data.

Juvenile Court Referrals, 1993 include children in the top three categories for Juvenile Court referrals: Unruly Behavior, Offenses Against Person, and Offenses Against Property. Referrals are cases that have been referred to Juvenile Court, and can be made by police, parents, school teacher/officials, or other sources. Unruly Behavior includes possession or purchase of alcoholic beverages, runaway in and out of state, truancy, ungovernable behavior, violation of conditions for conduct and control, violation of curfew, and other unruly behavior. Offenses Against Person includes assault, homicide, kidnaping or unlawful restraint, sex offenses, and other offenses against person. Offenses Against Property includes arson or endangering by fire, burglary, criminal mischief or damaging property, criminal trespass, forgery and counterfeiting, robbery, shoplifting, theft (other than shoplifting), unauthorized use of vehicle, and other offenses against property.

SOURCE: Office of State Court Administrator. (1993). Juvenile Court Reporting System. Unpublished Data.

Children Grades 7-12 Smoking Cigarettes Regularly, 1993 refers to children whose survey responses indicated they smoked from less than one pack to more than one pack of cigarettes per day (on the 1993 North Dakota Youth Alcohol and Drug Survey, conducted by the Department of Public Instruction). This survey was administered to 30,161 North Dakota students in grades 7-12 from an enrollment of 55,836, representing 55% of the enrollment. The survey included questions on alcohol consumption, use of drugs (including steroids), and smoking behaviors. Survey results from 1993 are the most recent available data.

SOURCE: North Dakota Department of Public Instruction. (1993). North Dakota Youth Alcohol and Drug Survey, Grades 7-12, 1993. Unpublished Data.

Children Grades 7-12 Ever Using Alcohol, 1993 refers to children whose survey responses indicated they used alcohol from less than once a month to every day (on the 1993 North Dakota Youth Alcohol and Drug Survey, conducted by the Department of Public Instruction). This survey was administered to 30,161 North Dakota students in grades 7-12 from an enrollment of 55,836, representing 55% of the enrollment. The survey included questions on alcohol consumption, use of drugs (including steroids), and smoking behaviors. Survey results from 1993 are the most recent available data.

SOURCE: North Dakota Department of Public Instruction. (1993). North Dakota Youth Alcohol and Drug Survey, Grades 7-12, 1993. Unpublished Data.

Children Ages 16-19 Not Enrolled in High School, Not High School Graduates, and Not in the Labor Force, 1990 measures the proportion of the population in this age category, who have not completed high school and are not enrolled at a given point in time; nor are they in the labor force at a given point in time.

Summary

Where do I go from here?

The North Dakota KIDS COUNT! Fact Book was designed to pool existing data consistently available across North Dakota counties. This baseline data will assist you in becoming more aware of issues that are impacting North Dakota children and youth in local communities.

People at various levels are interested in the status of their children. Whether you are a parent, grandparent, concerned citizen, local committee member, county commissioner, state legislator, or local, county or state level service provider, you will have the opportunity to scan the North Dakota KIDS COUNT! Fact Book and use the information to guide your action.

It is tempting to simply judge your county's performance in comparison to your neighboring county. It would be easy to find another county in worse shape than yours and conclude that all is well with the children in your community.

If you give into this reaction, you will no doubt miss the point of the KIDS COUNT! project, and miss this opportunity to seriously examine the strengths and challenges affecting children in your area.

Extension Educators across North Dakota counties have been trained to help local communities better understand their local KIDS COUNT! data. Extension staff can help educate community members about areas of concern for local children.

So, where do you go from here?

1. Carefully review and understand the definitions of data collected in KIDS COUNT!. It's easy to draw false conclusions.

2. Invite your County Extension educator to present the KIDS COUNT! curriculum to interested individuals and groups within your county. The more informed community members are, the greater the likelihood they will identify common concerns about the well-being of local children. Review the data and create a list of strengths and concerns. Incorporate other recent data available within your county.

3. Quantitative data, such as the numbers reported for indicators in this book, can only tell one part of the child well-being story. You will also want to look at county level qualitative data, such as anecdotal records, surveys, etc. Try to collect as much information as possible about the issues that surface as your community's greatest concerns for children.

4. Recognize that every adult can make a difference in the life of a child. So, too, communities of caring adults can find ways to improve the lives of local children through their combined efforts. Ensuring success for every child depends on individual acts of kindness as much as community participation in creating local solutions. Neither can succeed without the other.

5. Learn about local and regional programs that can help mobilize community support for addressing the needs of local children.

- Regional Children's Services Coordinating Committees are located in each of the eight service delivery regions of the state to coordinate and monitor children's programming. If you are interested in learning more about the work of your Regional Committee on behalf of local children, call the North Dakota KIDS COUNT! office at 701-777-4086 for the name of your local contact person.
- The Child Watch Program offers a practical way to familiarize community members with conditions affecting local children. Through Child Watch, communities organize field trips for local citizens to program sites where specific children's needs are illustrated. Paralleling similar efforts across the United States, some North Dakota communities have conducted Child Watch Visitations, using the experience as a catalyst to involve community members in finding solutions to problems facing local children. North Dakota has a Child Watch Trainer available to help interested communities learn how to organize a Child Watch Training Program. For information about Child Watch, contact the National Child Watch office at 202-662-3660 or the North Dakota KIDS COUNT! office at 701-777-4086.

Summary

- The Children's Sabbath Program is an effort designed to engage members of faith communities across America in learning about the challenges facing their children. Each October, churches and synagogues join in special worship services, education programs, and related activities inspiring people of all faiths to respond to children's needs. Many North Dakota faith communities have observed the Children's Sabbath for the past two years. The 1996 Observance of Children's Sabbath is scheduled for October 18, 19, and 20. For more information about Children's Sabbath, contact the National Children's Sabbath office at 202-662-3510; your local religious leaders; or the North Dakota KIDS COUNT! office at 701-777-4086.
- Join with others in your community to attend the Stand for Children in Washington, D.C. on June 1, 1996. The Stand for Children has been organized as a National Day of Commitment to children, when people from local communities in every state will come together to underscore their dedication to securing brighter futures for all children. It is an opportunity for Americans who care about children to affirm what unites them: a loving desire to raise moral, healthy, and educated children and a belief that every child deserves our best efforts to improve the quality of his or her life. Contact the Stand for Children office at 1-800-233-1200 for more information.

6. Share your ideas for future data collection and analysis. If you have an idea for a specific type of data you would like to see collected, or an analysis of this data you'd like to have explored, please share your suggestions. Each year the North Dakota KIDS COUNT! project will grow, and the feedback you provide is vital to future North Dakota KIDS COUNT! work. Please complete the feedback questionnaire enclosed with the book and return it to the North Dakota KIDS COUNT! office.

Whether you are in business, education, human service, ministry, government, health services, or a family member, you know how important it is to have the facts you need to make the best decisions possible.

This Fact Book and future North Dakota KIDS COUNT! publications are designed to assist you in collecting information necessary to make the best decisions possible for North Dakota children.

NORTH DAKOTA KIDS COUNT! FACT BOOK USER SURVEY

Who are we serving?

Which group best describes your line of work?

___Academic ___Private Business ___Nonprofit
___Govt. Agency ___Education ___Healthcare
___Research ___Judicial System ___Media

YOUR OPINION MATTERS TO NORTH DAKOTA CHILDREN!

North Dakota KIDS COUNT!, funded by the Annie E. Casey Foundation, is housed in the Children and Family Services Training Center at the University of North Dakota Social Work Department. The purpose of North Dakota KIDS COUNT! is to collect uniformly available data about child well-being in every county of the state. The goal of this effort is to increase public awareness about the needs of our children through strategies designed to reach a range of audiences sharing concern and responsibility for their condition. This goal is underpinned by the belief that the more we know about the needs of North Dakota children, the more likely we are to commit ourselves to the work of improving their lives.

Because the 1995 North Dakota KIDS COUNT! Fact Book has been designed as a tool to help a variety of audiences better understand the needs of North Dakota children, we would like to know how helpful this publication has been to those who have used it. By completing the survey on the reverse side, readers will assist us in tailoring future publications to fit identified on-going child data needs. Please feel free to share input, and suggestions. Thank you for your time and investment in the children of North Dakota.
